

OHMPRAKASH S

DevOps Engineer | System Infrastructure Specialist
psl.ohmprakash@gmail.com | +91-7010844900 | Bangalore, India

PROFESSIONAL SUMMARY

Dedicated DevOps and System Administration professional with 5+ years of progressive experience in containerization, infrastructure monitoring, and IT service management. Proficient in Docker, Kubernetes, Python scripting, Prometheus, Grafana, and ServiceNow. Proven track record of automating operations, maintaining system reliability, and delivering measurable improvements in enterprise-scale environments.

TECHNICAL SKILLS

Languages & Scripting: Python (Automation, Log Parsing, Health Check Scripts)

Containerization & Orchestration: Docker, Docker Compose, Kubernetes (kubectl, Deployments, HPA, RBAC, ConfigMaps)

Observability & Monitoring: Prometheus, Grafana, AlertManager, Node Exporter, kube-state-metrics

ITSM / Ticketing: ServiceNow (Incident, Change & Problem Management)

Operating Systems: Linux – Ubuntu, CentOS, RHEL | Windows Server

Core Competencies: Infrastructure Automation, CI/CD Support, SLA Compliance, Capacity Planning, Troubleshooting

PROFESSIONAL EXPERIENCE

Walmart Global Tech • *Senior Consultant – DevOps Engineer*

May 2023 – Present

- Managed multi-node Kubernetes clusters including Deployments, ReplicaSets, Services, ConfigMaps, Secrets, and Horizontal Pod Autoscaler (HPA) for production workloads.
- Optimised Docker images using multi-stage Dockerfiles, reducing image size by ~40%, and managed private container registries for secure artifact distribution.
- Developed Python automation scripts for log parsing, automated health checks, and alert notification workflows, reducing manual operational effort significantly.
- Deployed and configured Prometheus exporters (Node Exporter, kube-state-metrics) with custom scrape configs to collect cluster and application-level metrics.
- Built advanced Grafana dashboards with multi-source data panels, threshold-based visual alerts, and role-specific views for real-time infrastructure observability.
- Configured Prometheus AlertManager rules for CPU, memory, pod crash-loop, and disk saturation, routing alerts to PagerDuty and Slack channels.
- Managed end-to-end ITSM lifecycle — incident, change, and problem management — in ServiceNow, ensuring SLA compliance for all P1/P2 critical issues.

Gramener Technology • *Associate System Administrator*

Aug 2021 – Jan 2023

- Installed and configured Docker Engine on Linux servers; managed containers, volumes, networks, and multi-service applications using Docker Compose.
- Deployed applications on Kubernetes by authoring and applying YAML manifests for Pods, ReplicaSets, and Services using kubectl commands.
- Troubleshoot common container and cluster issues including crash-loop restarts, OOMKilled errors, image pull failures, and port binding conflicts using docker logs and kubectl describe/logs.
- Assisted in configuring Kubernetes Namespaces, resource limits (requests/limits), and basic RBAC policies to maintain isolation between dev and staging environments.
- Set up basic Prometheus monitoring and created Grafana panels to visualise server CPU, memory, and disk metrics for infrastructure health tracking.
- Administered Linux (Ubuntu/CentOS) servers — OS patching, user access management, cron jobs, and routine system maintenance to ensure uptime.
- Handled incident and service request tickets in ServiceNow, maintaining documentation and meeting SLA targets for internal teams.

Vays InfoTech • *System Administrator*

Oct 2020 – Jul 2021

- Monitored on-premise Linux and Windows server environments, performing daily health checks and proactive capacity planning.
- Supported Docker container deployments for internal applications, assisting developers with container lifecycle management and basic troubleshooting.
- Administered user accounts, group policies, and access controls across Active Directory and Linux-based systems.
- Tracked and resolved incidents via ServiceNow, ensuring timely escalation and resolution within defined SLA windows.

Precision Informatics (M) Pvt Ltd • *System Engineer*

Aug 2019 – Aug 2020

- Provided L1/L2 technical support for hardware, software, OS, and network infrastructure across the organisation.
- Performed server provisioning, OS installations (Linux/Windows), and basic network configuration for new infrastructure rollouts.
- Maintained asset inventory records, prepared SOPs, and supported monitoring dashboard setup for infrastructure visibility.

EDUCATION

BSc – Electronics and Communications • *K.S. Rangasamy College of Arts and Science*

2015 – 2018
